Clinical Neuropsychology at the University of Utah. The Department of Psychology at the University of Utah invites applications for a tenure-track Assistant Professor faculty position in Clinical Neuropsychology in our Clinical Psychology program. We are seeking applicants with a strong research record and strong clinical training in clinical neuropsychology, consistent with a Boulder model scientist-practitioner program. Board certification in clinical neuropsychology (or eligibility) is valued and encouraged, although not required. Responsibilities will include developing and maintaining an active program of research, graduate and undergraduate teaching, clinical supervision, and graduate mentorship. The Clinical Program has a strong history of collaboration within its major areas (clinical neuropsychology, clinical child and family, clinical health psychology, and human sexuality), as well as with the Department’s other three graduate training programs (Developmental, Social, and Cognition and Neural Sciences). Applications from individuals whose research interests lend themselves to such collaborations (e.g., pediatric neuropsychology, neurodevelopmental disorders and psychopathology, neuropsychology of personality, brain injury and health behavior, neuropsychology and medical illness, etc.) are particularly encouraged, although any area of research will be considered. Applicants with interest in populations across the entire human life span will find neuropsychology resources on or near campus, affording research and clinical work with pediatric, adult, and geriatric populations. Such resources include Primary Children’s Medical Center; Utah Brain Institute; Utah Neuropsychiatric Institute (UNI); Neurobehavioral Clinic; University Hospital; Center on Aging; Center for Alzheimer’s Care, Imaging, and Research (CACIR); Veterans Administration Medical Center; and functional imaging resources (PET, fMRI, MEG). The University of Utah is also home to Research Park, containing practical research opportunities for students and faculty; the park contains 42 companies and 69 academic departments. Additionally, in collaboration with the Department of Neurology and the School of Medicine, we are in the process of developing an APPCN post-doctoral training program in clinical neuropsychology. The University of Utah is located in Salt Lake City nestled in the foothills of the Wasatch Mountains. With an enrollment of 30,000 students, University of Utah is the flagship research university for the state of Utah, and ranks 15th in the nation for significant awards to faculty for research efforts. The Department of Psychology is committed to the goal of promoting diversity in academia and welcomes candidates whose interest and skills contribute to this goal. Please send a letter detailing current research and teaching interests, a curriculum vitae, representative reprints or preprints of publications, and three letters of reference by October 1, 2011 to Yana Suchy, Ph.D., Clinical Search Committee, Department of Psychology, 380 S. 1530 E., Room 502, University of Utah, Salt Lake City, UT 84112. The University of Utah values candidates who have experience working in settings with students from diverse backgrounds, and possess a strong commitment to improving access to higher education for historically underrepresented students. The University is an Equal Opportunity/Affirmative Action employer and educator. Minorities, women, and persons with disabilities are strongly encouraged to apply. Veterans’ preference. Reasonable accommodations provided. For additional information: http://www.regulations.utah.edu/humanResources/5-106.html. For more information about the department, see www.psych.utah.edu. For additional questions about the position, contact Dr. Suchy at yana.suchy@psych.utah.edu.
