

## **Volunteer Research Assistant**

Dr. Paul Carlson

Mental Illness Research, Education, and Clinical Center  
Veterans Affairs Medical Center, Salt Lake City

### Clinical and Neuroimaging Research

Dr. Paul Carlson is studying mood disorders through the use of PET imaging and MR Spectroscopy. He is currently looking for a research assistant to help with recruitment and study coordination. Specific duties may include developing and hanging fliers, literature searches, screening potential participants, scheduling participants for various portions of the study, organizing and updating study files, and assisting with neuroimaging. This is a volunteer position that will include about 10-15 hours a week. This is a great experience to include in graduate school applications and may lead to a letter of recommendation.

If you are interested, please email Cheryl Garn ([cheryl.garn@va.gov](mailto:cheryl.garn@va.gov)) and include an unofficial copy of your transcripts, a résumé or CV, and contact information.
